SKILLS

JavaScript, Node.js, React, Redux.js, Express, Python, Flask, SQLAlchemy, HTML, CSS, Postgres, Heroku, Git, SQL, Sequelize, Docker, Mocha, Object-Oriented Programming, Test-Driven Development

PROJECTS

Keypop (Javascript, React-Redux, Python, Flask, SQLAlchemy)   live | github
Marketplace application where users can buy or sell used keyboards or keyboard parts
- Leveraged LocalStorage to store items placed in the user's Shopping Cart so each product would persist on refresh/reload of the site and still be contained in the Cart
- Designed a dynamic product page with JSX conditional rendering to display whether the item was available to "Add to Cart", already "Added to Cart", or "Sold"
- Implemented search bar functionality by sending a query string to the Python Backend API and filtering out products that didn't include the query string in their description
- Incorporated a feature to narrow down listed products by "Category", "Sub-Category", and "Condition" using the Python filter method

Sidewalk Surfers   (JavaScript, React-Redux, Python, Flask, SQLAlchemy, Google Maps API)   live | github
Place for skateboarders to share images and videos of their favorite parks or skate spots
- Leveraged Google Maps Geocoding API to provide an intuitive user experience and usability by translating user street address inputs into latitude and longitude coordinates.
- Integrated Google Maps API with custom map-markers to display the location of each skateboarding spot with
- real-time, relevant data for the user.
- Designed an Instagram-like media posts that could be easily replicated throughout the website using React components and JSX conditional rendering so only a logged in user can comment on said posts

Recital (JavaScript, React-Redux, Express, SQL)   live | github
Web application dedicated to uploading quotes from your favorite movie or tv show
- Implemented a search feature by sending a query string to the Express Backend API and filtering out movies that didn't include the query string in their title
- Leveraged the built in HTML Audio Player to play audio files and incorporated Javascript to dynamically update the source file being played
- Managed audio files by making calls to the Express Backend API searching for any audio related to the given movie in the PostgreSQL database and saving the information in a Redux.js store

EXPERIENCE

Pharmacy Technician   *CVS Pharmacy, Inc.* February 2019 - February 2021
- Counted and measured prescriptions, applied labels and verified accuracy with Pharmacist prior to dispensing
- Checked pharmacy stock to assess inventory level, placed orders, removed outdated drugs
- Verified patient insurance information and processed claims; investigated and quickly resolved patient billing and insurance concerns
- Precisely maintained OTC and pharmacy inventory, properly documented and disposed of expired products
- Quickly and professionally greeted customers at counter and drive-through window and answered high volume of phone calls from customers and physicians
- Completed and updated patient profiles with correct billing, insurance and prescription information
- Contacted physician offices via phone and fax to obtain prescription refill authorizations

EDUCATION

App Academy - *Web Development | March 2021 - September 2021*
